Details

Without Name Servers your Self-hosted Domains and the websites they resolve for aren't viewable by your customers and this VPS product provides you with full access to the WHM/cPanel DNSONLY software, as well as the underlying CentOS Linux operating system in order to configure and use this VPS as you wish. We are available to assist with DNS settings if you need post VPS hand-over.

You can also select whether you'd like this Name Server VPS provisioned in our main Sydney Data Centre POP, or in our Canberra POP, for geo-redundancy if required.
