### Details

A Linux server configured as an Anti-Spam and Anti-Virus Mail Server and the stable release of the Mailman open-source software installed & running.

Webmin and other web-based systems are pre-installed to provide you with full system and server remote access, should the Admin functions inside Mailman not be sufficient for site operations.

This is a "managed" VPS product, so updates to software packages are installed by Network Presence SysAdmins in cooperation with the customer.

You have 24x7 Ticketed and 8am to 8pm Live SysAdmin Support included.
