Details

A Debian 7 Linux server configured as an Anti-Spam and Anti-Virus Mail Server and the stable release of the [Mailman](#) open-source software installed & running.

Webmin and other web-based systems are pre-installed to provide you with full system and server remote access, should the Admin functions inside Mailpile not be sufficient for site operations.

While this is not a "managed" VPS product, Network Presence is available to assist with software updates or custom configuration.

You have 24x7 Ticketed and 8am to 8pm Live SysAdmin Support included.
